

# DISTRICT FORESTER OFFICES

**District Foresters** are professionally trained foresters employed, by the Department of Natural Resources' Division of Forestry, to assist private forest owners with the management of their forestlands. This is accomplished through the administration of incentive programs such as the Classified Forest program and cost share assistance programs to implement forest stewardship practices. District Foresters also provide professional technical advice on timber harvesting, tree planting and other forest management activities. To arrange a woodland consultation contact your District Forester by email, office visits or phone.

**Again this year - Our Select line of seedlings.** Black Walnut, Red Oak and Black Cherry seedlings from our top performing seed orchard trees. The parent trees have been selected for their superior growth and form characteristics. **Hybrid Butternut** seedlings are a naturally occurring hybrid between Native Butternut and Japanese Walnut. These trees have many of the same characteristics in growth, form and nut production but appear to have a much higher level of resistance to Butternut canker.
